Grass mixture for all sites:

- Weeping Love Grass - *Eragrostis curvula* is a warm season, perennial bunchgrass. It grows to a height of 2-4 feet and has 1/4" leaves of 10 to 20 inches in length. The long folding leaves suggest its name "weeping". Seed heads are erect or drooping and produce small very numerous seeds (1.5 million per lb.). **PLANTING RATES:** Lawn Meadow / Covered field rates: 5 lbs. per acre.

- Creeping Red Fescue - *Festuca rubra* L. ssp. *arenaria* (Osbeck) F. Aresch is an economical cool season grass with a very fine texture and is the best shade tolerant fescue. Creeping Red Fescue is often another name for Red Fescue. Red Fescue is a shade tolerant, eco-friendly grass that is easy to grow from seed. Red Fescue is easy on the environment due to low water, mowing and fertilization requirements. **PLANTING RATES:** Lawn Meadow / Covered field rates: 5 lbs. per acre.

 - Tall fescue - (*Festuca arundinacea*) is perhaps the most popular grass in the mountains and upper piedmont areas of South Carolina, which extend as far east as Columbia. Its popularity relates to its ease of establishment through seeding and its green color during the winter months when warm-season turf grasses are dormant and brown. **PLANTING RATES:** Lawn Meadow / Covered field rates: 7 lbs. per 1000 sq. ft.

 - Annual Rye grass over seeding and quick establishment. **PLANTING RATES:** Lawn Meadow / Covered field rates: 2.5 lbs. per 1000 sq. ft.
